MITCHELL VIZENSKY

SENIOR UX/UI DESIGNER

mail@mitchellv.me
mitchellv.me
Issaquah, WA

SUMMARY

Senior UX/UI designer with 14 years in the games industry, blending visual craft with user research and product strategy. Designs and ships experiences across console, mobile, desktop and web for products reaching millions of players, and has built user research processes that scale across teams. Strong in systems thinking, cross-functional leadership, and turning ambiguous problems into clear, measurable design outcomes.

WORK EXPERIENCE

The Pokémon Company International - Senior UX Designer — Mar 2021 - Present

- Established the user research process for Pokémon's Game Studio team.
- Designed, implemented and launched Pokémon TV on Nintendo Switch. Monthly active users across all platforms grew 33.5% after launch.
- Contributes UX/UI design to Pokémon Trading Card Game Live across desktop and mobile.
- Serves as a UX/UI resource for many internal teams and projects.

Amazon - UX Designer II — Jan 2020 - Mar 2021

- Supported Amazon's Mobile Games Experience (MGX) department, which grossed $200M+ in revenue in 2020.
- Piloted usability studies that drove design decisions with qualitative data.
- Influenced leadership decisions across four products at once, spanning iOS, Android, FireOS and web.
- Navigated complex cross-platform constraints and translated detailed design specs for engineering teams.

Big Fish Games - UX/UI Designer — May 2016 - May 2019

- Led UX/UI design on several top-grossing iOS and Android apps, including Big Fish Casino.
- Redesigned the Big Fish Casino store, increasing sales 38.4% over the previous store.
- Produced mockups, flows, prototypes and wireframes through a fast, iterative process that fed user testing.

PLAYSTUDIOS - Art Director / UX Designer — Mar 2012 - May 2016

- Shipped 30+ games to over two million daily active iOS, Android and Facebook users.
- Directed art and partnered with game designers to ship entertaining, visually polished titles.
- Pitched games to the board of directors and managed a small production team from concept to launch.

INDEPENDENT PROJECTS

VitaOS - Designer & Developer — 2026

- Designed and built a free, open-source home screen for the PS Vita end to end: information architecture, interface, motion, sound and code. github.com/hotdog-face/VitaOS

EDUCATION

Milwaukee Institute of Art & Design - B.F.A., Motion Graphics / Animation (2011). Dean's List (3.8 GPA), Major Class Representative.

The Animation Collaborative (2014) - Mentorship with Pixar artists Chris Sasaki and Albert Lozano.
